## **QUALITY AND ENVIRONMENT PROTECTION MANAGEMENT POLICIES**

Quality and Environment Protection Management Policies are making part of the integral business policies of PROPULZIJA d.o.o. (hereinafter: the Company).

The Company's activities are preventive and corrective maintenance of MTU high-speed internal combustion engines and of the electronic equipment and devices connected with these, as well as fitting and starting industrial and marine propulsion systems.

Orientation to the customers' needs and satisfaction with the job performed make the highest values by which the Company measures and determines its overall success.

When rendering our services, particular attention is paid to decreasing any negative impact to the environment.

In order to reach, maintain and strengthen these values, the Company Board has committed itself permanently to the following:

- all the employees must have the opportunity and duty permanently to develop and advance;
- in the working processes to impact the environment positively, permanently improving attitude for the environment and endeavouring all our solutions to include care for environment protection and energy efficiency;
- performing all the statutory measures pertaining disposing of the waste created in the working processes;
- following up statutory and other compulsory regulations and permanently harmonising with it;
- applying efficient safety at work measures and procuring every necessary safety equipment that will guarantee high level of our employees' general and health safety;

- staying open to communications with all the interested parties on the matters of environment and health protection and employee safety;
- consulting the employees and including them into making the decisions related to the health protection and safety at work;
- applying and improving efficiency of the integrated management system based on the requirements of the international standard ISO 9001:2015.

The Company's Board, managers and employees must be acquainted with the policies related to managing quality, environment, health and safety at work, and to understand and accept these as permanent principles of their own activities.

PROPULZIJA d.o.o.
